

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p style="text-align: center;">INTERNATIONAL STANDARDS AND RECOMMENDED PRACTICES</p> <p style="text-align: center;">CHAPTER 1. DEFINITIONS</p> <p>When the following terms are used in the Standards and Recommended Practices for operation of aircraft in international commercial air transport, they have the following meanings:</p> <p><i>Accelerate-stop distance available (ASDA).</i> The length of the take-off run available plus the length of stopway, if provided.</p>	CV-CAR 8 8.A.115 (54)	No Difference		
Chapter 1 Reference Definition	<i>Aerial work.</i> An aircraft operation in which an aircraft is used for specialized services such as agriculture, construction, photography, surveying, observation and patrol, search and rescue, aerial advertisement, etc.	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	<i>Aerodrome.</i> A defined area on land or water (including any buildings, installations and equipment) intended to be used either wholly or in part for the arrival, departure and surface movement of aircraft.	CV CAR 1.F (a)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p><i>Aerodrome operating minima.</i> The limits of usability of an aerodrome for:</p> <ul style="list-style-type: none"> a) take-off, expressed in terms of runway visual range and/or visibility and, if necessary, cloud conditions; b) landing in 2D instrument approach operations, expressed in terms of visibility and/or runway visual range, minimum descent altitude/height (MDA/H) and, if necessary, cloud conditions; and c) landing in 3D instrument approach operations, expressed in terms of visibility and/or runway visual range and decision altitude/height (DA/H) as appropriate to the type and/or category of the operation. 	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	<p><i>Aeroplane.</i> A power-driven heavier-than-air aircraft, deriving its lift in flight chiefly from aerodynamic reactions on surfaces which remain fixed under given conditions of flight.</p>	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	<p><i>Aircraft.</i> Any machine that can derive support in the atmosphere from the reactions of the air other than the reactions of the air against the earth's surface.</p>	CV CAR 1.F (a)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p>Aircraft operating manual. A manual, acceptable to the State of the Operator, containing normal, abnormal and emergency procedures, checklists, limitations, performance information, details of the aircraft systems and other material relevant to the operation of the aircraft.</p> <p><i>Note.— The aircraft operating manual is part of the operations manual.</i></p>	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	<p>Aircraft tracking. A process, established by the operator, that maintains and updates, at standardized intervals, a ground-based record of the four dimensional position of individual aircraft in flight.</p>	CV-CAR 77.A.110 (60)	No Difference		
Chapter 1 Reference Definition	<p>Air operator certificate (AOC). A certificate authorizing an operator to carry out specified commercial air transport operations.</p>	CV CAR 77.A.110(11)	No Difference		
Chapter 1 Reference Definition	<p>Air traffic service (ATS). A generic term meaning variously, flight information service, alerting service, air traffic advisory service, air traffic control service (area control service, approach control service or aerodrome control service).</p>	CV-CAR 88.A.115 (148)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<i>Airworthy.</i> The status of an aircraft, engine, propeller or part when it conforms to its approved design and is in a condition for safe operation.	CV CAR 5 5.A.115	No Difference		
Chapter 1 Reference Definition	<p><i>Alternate aerodrome.</i> An aerodrome to which an aircraft may proceed when it becomes either impossible or inadvisable to proceed to or to land at the aerodrome of intended landing where the necessary services and facilities are available, where aircraft performance requirements can be met and which is operational at the expected time of use. Alternate aerodromes include the following:</p> <p><i>Take-off alternate.</i> An alternate aerodrome at which an aircraft would be able to land should this become necessary shortly after take-off and it is not possible to use the aerodrome of departure.</p> <p><i>En-route alternate.</i> An alternate aerodrome at which an aircraft would be able to land in the event that a diversion becomes necessary while en route.</p> <p><i>Destination alternate.</i> An alternate aerodrome at which an aircraft would be able to land should it become either impossible or inadvisable to land at the aerodrome of intended landing.</p> <p><i>Note.— The aerodrome from which a flight departs may also be an en-route or a destination alternate aerodrome for that flight.</i></p>	CV CAR 1.F (a)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Altimetry system error (ASE). The difference between the altitude indicated by the altimeter display, assuming a correct altimeter barometric setting, and the pressure altitude corresponding to the undisturbed ambient pressure.	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	Appropriate airworthiness requirements. The comprehensive and detailed airworthiness codes established, adopted or accepted by a Contracting State for the class of aircraft, engine or propeller under consideration.	CV CAR 55.A.115 (29)	No Difference		
Chapter 1 Reference Definition	Area navigation (RNAV). A method of navigation which permits aircraft operation on any desired flight path within the coverage of ground- or space-based navigation aids or within the limits of the capability of self-contained aids, or a combination of these. <i>Note.— Area navigation includes performance-based navigation as well as other operations that do not meet the definition of performance-based navigation.</i>	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	Cabin crew member. A crew member who performs, in the interest of safety of passengers, duties assigned by the operator or the pilot-in-command of the aircraft, but who shall not act as a flight crew member.	CV CAR 88.A.110 (89)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	COMAT. Operator material carried on an operator's aircraft for the operator's own purposes.		Less protective or partially implemented or not implemented	Not implemented in CV CAR's.	
Chapter 1 Reference Definition	Combined vision system (CVS). A system to display images from a combination of an enhanced vision system (EVS) and a synthetic vision system (SVS).	CV-CAR 7 7.A.115(58)	No Difference		
Chapter 1 Reference Definition	Commercial air transport operation. An aircraft operation involving the transport of passengers, cargo or mail for remuneration or hire.	CV CAR 7 7.A.110 (38)	No Difference		
Chapter 1 Reference Definition	Configuration deviation list (CDL). A list established by the organization responsible for the type design with the approval of the State of Design which identifies any external parts of an aircraft type which may be missing at the commencement of a flight, and which contains, where necessary, any information on associated operating limitations and performance correction.	CV-CAR 99.A.115(15)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Continuous descent final approach (CDFA). A technique, consistent with stabilized approach procedures, for flying the final approach segment of a non-precision instrument approach procedure as a continuous descent, without level-off, from an altitude/height at or above the final approach fix altitude/height to a point approximately 15 m (50 ft) above the landing runway threshold or the point where the flare manoeuvre should begin for the type of aircraft flown.	CV-CAR 88.A.115 (21)	No Difference		
Chapter 1 Reference Definition	Crew member. A person assigned by an operator to duty on an aircraft during a flight duty period.	CV CAR 88.A.115 (88)	No Difference		
Chapter 1 Reference Definition	Cruise relief pilot. A flight crew member who is assigned to perform pilot tasks during cruise flight, to allow the pilot-in-command or a co-pilot to obtain planned rest.	CV-CAR 88.A.115 (122)	No Difference		
Chapter 1 Reference Definition	Cruising level. A level maintained during a significant portion of a flight.	CV CAR 8 8.A.115 (97)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p>Dangerous goods. Articles or substances which are capable of posing a risk to health, safety, property or the environment and which are shown in the list of dangerous goods in the Technical Instructions or which are classified according to those Instructions.</p> <p><i>Note.— Dangerous goods are classified in Annex 18, Chapter 3.</i></p>	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	<p>Decision altitude (DA) or decision height (DH). A specified altitude or height in a 3D instrument approach operation at which a missed approach must be initiated if the required visual reference to continue the approach has not been established.</p> <p><i>Note 1.— Decision altitude (DA) is referenced to mean sea level and decision height (DH) is referenced to the threshold elevation.</i></p> <p><i>Note 2.— The required visual reference means that section of the visual aids or of the approach area which should have been in view for sufficient time for the pilot to have made an assessment of the aircraft position and rate of change of position, in relation to the desired flight path. In Category III operations with a decision height the required visual reference is that specified for the particular procedure and operation.</i></p> <p><i>Note 3.— For convenience where both expressions are used they may be written in the form “decision altitude/height” and abbreviated “DA/H”.</i></p>	CV CAR 8 8.A.115 (14)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference	Dry runway. †† A runway is considered dry if its surface is free of visible moisture and not contaminated within the area intended to be used.	CV-CAR 8 8.A.115 (138)	No Difference		
Definition	----- †† Applicable as of 5 November 2020.				
Chapter 1 Reference	Duty. Any task that flight or cabin crew members are required by the operator to perform, including, for example, flight duty, administrative work, training, positioning and standby when it is likely to induce fatigue.	Decreto-lei nº 66/2009	No Difference		
Definition					
Chapter 1 Reference	Duty period. A period which starts when a flight or cabin crew member is required by an operator to report for or to commence a duty and ends when that person is free from all duties.	CV-CAR 1 1.F (a) Decreto-lei nº 66/2009	No Difference		
Definition					
Chapter 1 Reference	EDTO critical fuel. The fuel quantity necessary to fly to an en-route alternate aerodrome considering, at the most critical point on the route, the most limiting system failure.	CV-CAR 8 8.A.115(39)	No Difference		
Definition	<i>Note.— Attachment C contains guidance on EDTO critical fuel scenarios.</i>				
Chapter 1 Reference	EDTO significant system. An aeroplane system whose failure or degradation could adversely affect the safety particular to an EDTO flight, or whose continued functioning is specifically important to the safe flight and landing of an aeroplane during an EDTO diversion.	CV-CAR 88.A.115(152)	No Difference		
Definition					

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Electronic flight bag (EFB). An electronic information system, comprised of equipment and applications for flight crew, which allows for the storing, updating, displaying and processing of EFB functions to support flight operations or duties.	CV-CAR 77.A.110 (30)	No Difference		
Chapter 1 Reference Definition	Emergency locator transmitter (ELT). A generic term describing equipment which broadcast distinctive signals on designated frequencies and, depending on application, may be automatically activated by impact or be manually activated. An ELT may be any of the following: <i>Automatic fixed ELT (ELT(AF)).</i> An automatically activated ELT which is permanently attached to an aircraft. <i>Automatic portable ELT (ELT(AP)).</i> An automatically activated ELT which is rigidly attached to an aircraft but readily removable from the aircraft. <i>Automatic deployable ELT (ELT(AD)).</i> An ELT which is rigidly attached to an aircraft and which is automatically deployed and activated by impact, and, in some cases, also by hydrostatic sensors. Manual deployment is also provided. <i>Survival ELT (ELT(S)).</i> An ELT which is removable from an aircraft, stowed so as to facilitate its ready use in an emergency, and manually activated by survivors.	CV CAR 1.F (a) CV-CAR 77.A.110 (61)	No Difference		
Chapter 1 Reference Definition	Engine. A unit used or intended to be used for aircraft propulsion. It consists of at least those components and equipment necessary for functioning and control, but excludes the propeller/rotors (if applicable).	CV-CAR 7 7.A.110 (31)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p>Enhanced vision system (EVS). A system to display electronic real-time images of the external scene achieved through the use of image sensors.</p> <p><i>Note.— EVS does not include night vision imaging systems (NVIS).</i></p>	CV-CAR 7 7.A.110 (56)	No Difference		
Chapter 1 Reference Definition	<p>Extended diversion time operations (EDTO). Any operation by an aeroplane with two or more turbine engines where the diversion time to an en-route alternate aerodrome is greater than the threshold time established by the State of the Operator.</p>	CV-CAR 8 8.A.115 (115)	No Difference		
Chapter 1 Reference Definition	<p>Fatigue. A physiological state of reduced mental or physical performance capability resulting from sleep loss, extended wakefulness, circadian phase, and/or workload (mental and/or physical activity) that can impair a person's alertness and ability to perform safety-related operational duties.</p>	CV-CAR 8 8.A.115 (61)	No Difference		
Chapter 1 Reference Definition	<p>Fatigue Risk Management System (FRMS). A data-driven means of continuously monitoring and managing fatigue-related safety risks, based upon scientific principles and knowledge as well as operational experience that aims to ensure relevant personnel are performing at adequate levels of alertness.</p>	CV-CAR 8 8.A.115 (151)	No Difference		
Chapter 1 Reference Definition	<p>Final approach segment (FAS). That segment of an instrument approach procedure in which alignment and descent for landing are accomplished.</p>	CV-CAR 88.A.115 (161)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Flight crew member. A licensed crew member charged with duties essential to the operation of an aircraft during a flight duty period.	CV-CAR 9 9.A.115 (19)	No Difference		
Chapter 1 Reference Definition	Flight data analysis. A process of analysing recorded flight data in order to improve the safety of flight operations.	CV-CAR 9 9.A.115 (3)	No Difference		
Chapter 1 Reference Definition	Flight duty period. A period which commences when a flight or cabin crew member is required to report for duty that includes a flight or a series of flights and which finishes when the aircraft finally comes to rest and the engines are shut down at the end of the last flight on which he/she is a crew member.	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	Flight manual. A manual, associated with the certificate of airworthiness, containing limitations within which the aircraft is to be considered airworthy, and instructions and information necessary to the flight crew members for the safe operation of the aircraft.	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	Flight operations officer/flight dispatcher. A person designated by the operator to engage in the control and supervision of flight operations, whether licensed or not, suitably qualified in accordance with Annex 1, who supports, briefs and/or assists the pilot-in-command in the safe conduct of the flight.	CV CAR 1.F (a)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Flight plan. Specified information provided to air traffic services units, relative to an intended flight or portion of a flight of an aircraft.	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	Flight recorder. Any type of recorder installed in the aircraft for the purpose of complementing accident/incident investigation. <i>Automatic deployable flight recorder (ADFR).</i> A combination flight recorder installed on the aircraft which is capable of automatically deploying from the aircraft.	CV CAR 77.A.110(47)	No Difference		
Chapter 1 Reference Definition	Flight safety documents system. A set of interrelated documentation established by the operator, compiling and organizing information necessary for flight and ground operations, and comprising, as a minimum, the operations manual and the operator's maintenance control manual.	CV-CAR 99.A.115 (25)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p>Flight simulation training device. Any one of the following three types of apparatus in which flight conditions are simulated on the ground:</p> <p><i>A flight simulator,</i> which provides an accurate representation of the flight deck of a particular aircraft type to the extent that the mechanical, electrical, electronic, etc. aircraft systems control functions, the normal environment of flight crew members, and the performance and flight characteristics of that type of aircraft are realistically simulated;</p> <p><i>A flight procedures trainer,</i> which provides a realistic flight deck environment, and which simulates instrument responses, simple control functions of mechanical, electrical, electronic, etc. aircraft systems, and the performance and flight characteristics of aircraft of a particular class;</p> <p><i>A basic instrument flight trainer,</i> which is equipped with appropriate instruments, and which simulates the flight deck environment of an aircraft in flight in instrument flight conditions.</p>	CV-CAR 88.A.115 (53)CV-CAR 11.F (a)	No Difference		
Chapter 1 Reference Definition	<p>Flight time — aeroplanes. The total time from the moment an aeroplane first moves for the purpose of taking off until the moment it finally comes to rest at the end of the flight.</p> <p><i>Note.— Flight time as here defined is synonymous with the term “block to block” time or “chock to chock” time in general usage which is measured from the time an aeroplane first moves for the purpose of taking off until it finally stops at the end of the flight.</i></p>	CV CAR 88.A.115(153)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	General aviation operation. An aircraft operation other than a commercial air transport operation or an aerial work operation.	CV CAR 1212.A.115 (25)	No Difference		
Chapter 1 Reference Definition	Ground handling. Services necessary for an aircraft's arrival at, and departure from, an airport, other than air traffic services.	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	Head-up display (HUD). A display system that presents flight information into the pilot's forward external field of view.	CV-CAR 7 7.A.110 (13)	No Difference		
Chapter 1 Reference Definition	Human Factors principles. Principles which apply to aeronautical design, certification, training, operations and maintenance and which seek safe interface between the human and other system components by proper consideration to human performance.	CV CAR 1.F (a)CV CAR1111.A.115(18)	No Difference		
Chapter 1 Reference Definition	Human performance. Human capabilities and limitations which have an impact on the safety and efficiency of aeronautical operations.	CV CAR 1.F (a) CV CAR 1717.A.115(32)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
<p>Chapter 1 Reference</p> <p>Definition</p>	<p><i>Instrument approach operations.</i> An approach and landing using instruments for navigation guidance based on an instrument approach procedure. There are two methods for executing instrument approach operations:</p> <p>a) a two-dimensional (2D) instrument approach operation, using lateral navigation guidance only; and</p> <p>b) a three-dimensional (3D) instrument approach operation, using both lateral and vertical navigation guidance.</p> <p><i>Note.— Lateral and vertical navigation guidance refers to the guidance provided either by:</i></p> <p><i>a ground-based radio navigation aid; or</i></p> <p><i>computer-generated navigation data from ground-based, space-based, self-contained navigation aids or a combination of these.</i></p>	<p>CV-CAR 88.A.115 (116)</p>	<p>No Difference</p>		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p>Instrument approach procedure (IAP). A series of predetermined manoeuvres by reference to flight instruments with specified protection from obstacles from the initial approach fix, or where applicable, from the beginning of a defined arrival route to a point from which a landing can be completed and thereafter, if a landing is not completed, to a position at which holding or en-route obstacle clearance criteria apply. Instrument approach procedures are classified as follows:</p> <p><i>Non-precision approach (NPA) procedure.</i> An instrument approach procedure designed for 2D instrument approach operations Type A.</p> <p><i>Note.— Non-precision approach procedures may be flown using a continuous descent final approach (CDFA) technique. CDFAs with advisory VNAV guidance calculated by on-board equipment are considered 3D instrument approach operations. CDFAs with manual calculation of the required rate of descent are considered 2D instrument approach operations. For more information on CDFAs, refer to PANS-OPS (Doc 8168), Volume I, Part II, Section 5.</i></p> <p><i>Approach procedure with vertical guidance (APV).</i> A performance-based navigation (PBN) instrument approach procedure designed for 3D instrument approach operations Type A.</p> <p><i>Precision approach (PA) procedure.</i> An instrument approach procedure based on navigation systems (ILS, MLS, GLS and SBAS CAT I) designed for 3D instrument approach operations Type A or B.</p> <p><i>Note.— Refer to 4.2.8.3 for instrument approach operation types.</i></p>	CV-CAR 88.A.115 (147)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p>Instrument meteorological conditions (IMC). Meteorological conditions expressed in terms of visibility, distance from cloud, and ceiling,* less than the minima specified for visual meteorological conditions.</p> <p><i>Note.— The specified minima for visual meteorological conditions are contained in Chapter 4 of Annex 2.</i></p> <p>-----</p> <p>* As defined in Annex 2.</p>	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	<p>Isolated aerodrome. A destination aerodrome for which there is no destination alternate aerodrome suitable for a given aeroplane type.</p>	CV-CAR 88.A.115 (7)	No Difference		
Chapter 1 Reference Definition	<p>Landing distance available (LDA). The length of runway which is declared available and suitable for the ground run of an aeroplane landing.</p>	CV-CAR 88.A.115 (58)	No Difference		
Chapter 1 Reference Definition	<p>Large aeroplane. An aeroplane of a maximum certificated take-off mass of over 5 700 kg.</p>	CV CAR 1.F (a)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Maintenance. † The performance of tasks required to ensure the continuing airworthiness of an aircraft, including any one or combination of overhaul, inspection, replacement, defect rectification, and the embodiment of a modification or repair. ----- † Applicable until 4 November 2020.	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	Maintenance. †† The performance of tasks on an aircraft, engine, propeller or associated part required to ensure the continuing airworthiness of an aircraft, engine, propeller or associated part including any one or combination of overhaul, inspection, replacement, defect rectification, and the embodiment of a modification or repair. ----- †† Applicable as of 5 November 2020.	CV CAR 55.A.115 (22)	No Difference		
Chapter 1 Reference Definition	Maintenance organization's procedures manual. † A document endorsed by the head of the maintenance organization which details the maintenance organization's structure and management responsibilities, scope of work, description of facilities, maintenance procedures and quality assurance or inspection systems. ----- † Applicable until 4 November 2020.	CV-CAR 6 6.A.115 (21)	No Difference		
Chapter 1 Reference Definition	Maintenance programme. A document which describes the specific scheduled maintenance tasks and their frequency of completion and related procedures, such as a reliability programme, necessary for the safe operation of those aircraft to which it applies.	CV CAR 1.F (a)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p>Maintenance release.† A document which contains a certification confirming that the maintenance work to which it relates has been completed in a satisfactory manner, either in accordance with the approved data and the procedures described in the maintenance organization's procedures manual or under an equivalent system.</p> <p>-----</p> <p>† Applicable until 4 November 2020.</p>	CV-CAR 6 6.A.115 (11)	No Difference		
Chapter 1 Reference Definition	<p>Maintenance release.†† A document which contains a certification confirming that the maintenance work to which it relates has been completed in a satisfactory manner in accordance with appropriate airworthiness requirements.</p> <p>-----</p> <p>†† Applicable as of 5 November 2020.</p>	CV-CAR 5 5.A.115 (10)	No Difference		
Chapter 1 Reference Definition	<p>Master minimum equipment list (MMEL). A list established for a particular aircraft type by the organization responsible for the type design with the approval of the State of Design containing items, one or more of which is permitted to be unserviceable at the commencement of a flight. The MMEL may be associated with special operating conditions, limitations or procedures.</p>	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	<p>Maximum diversion time. Maximum allowable range, expressed in time, from a point on a route to an en-route alternate aerodrome.</p>	CV-CAR 88.A.115 (80)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Maximum mass. Maximum certificated take-off mass.	CV CAR 1.F (a) CV-CAR 88.A.115 (87)	No Difference		
Chapter 1 Reference Definition	<p>Minimum descent altitude (MDA) or minimum descent height (MDH). A specified altitude or height in a 2D instrument approach operation or circling approach operation below which descent must not be made without the required visual reference.</p> <p><i>Note 1.— Minimum descent altitude (MDA) is referenced to mean sea level and minimum descent height (MDH) is referenced to the aerodrome elevation or to the threshold elevation if that is more than 2 m (7 ft) below the aerodrome elevation. A minimum descent height for a circling approach is referenced to the aerodrome elevation.</i></p> <p><i>Note 2.— The required visual reference means that section of the visual aids or of the approach area which should have been in view for sufficient time for the pilot to have made an assessment of the aircraft position and rate of change of position, in relation to the desired flight path. In the case of a circling approach the required visual reference is the runway environment.</i></p> <p><i>Note 3.— For convenience when both expressions are used they may be written in the form “minimum descent altitude/ height” and abbreviated “MDA/H”.</i></p>	CV CAR 1.F (a)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Minimum equipment list (MEL). A list which provides for the operation of aircraft, subject to specified conditions, with particular equipment inoperative, prepared by an operator in conformity with, or more restrictive than, the MMEL established for the aircraft type.	CV CAR 1.F (a)	No Difference		
Chapter 1 Reference Definition	Modification. A change to the type design of an aircraft, engine or propeller. <i>Note.— A modification may also include the embodiment of the modification which is a maintenance task subject to a maintenance release. Further guidance on aircraft maintenance — modification and repair is contained in the Airworthiness Manual (Doc 9760).</i>	CV CAR 55.A.115 (24)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p>Navigation specification. A set of aircraft and flight crew requirements needed to support performance-based navigation operations within a defined airspace. There are two kinds of navigation specifications:</p> <p><i>Required navigation performance (RNP) specification.</i> A navigation specification based on area navigation that includes the requirement for performance monitoring and alerting, designated by the prefix RNP, e.g. RNP 4, RNP APCH.</p> <p><i>Area navigation (RNAV) specification.</i> A navigation specification based on area navigation that does not include the requirement for performance monitoring and alerting, designated by the prefix RNAV, e.g. RNAV 5, RNAV 1.</p> <p><i>Note 1.— The Performance-based Navigation (PBN) Manual (Doc 9613), Volume II, contains detailed guidance on navigation specifications.</i></p> <p><i>Note 2.— The term RNP, previously defined as “a statement of the navigation performance necessary for operation within a defined airspace”, has been removed from this Annex as the concept of RNP has been overtaken by the concept of PBN. The term RNP in this Annex is now solely used in the context of navigation specifications that require performance monitoring and alerting, e.g. RNP 4 refers to the aircraft and operating requirements, including a 4 NM lateral performance with on-board performance monitoring and alerting that are detailed in Doc 9613.</i></p>	CV CAR 1.F (a) CV CAR 1515.A.115 (43)	No Difference

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p>Night. The hours between the end of evening civil twilight and the beginning of morning civil twilight or such other period between sunset and sunrise, as may be prescribed by the appropriate authority.</p> <p><i>Note.— Civil twilight ends in the evening when the centre of the sun's disc is 6 degrees below the horizon and begins in the morning when the centre of the sun's disc is 6 degrees below the horizon.</i></p>	CV CAR 1.F (a) CV CAR 88.A.115(99)	No Difference		
Chapter 1 Reference Definition	<p>Obstacle clearance altitude (OCA) or obstacle clearance height (OCH). The lowest altitude or the lowest height above the elevation of the relevant runway threshold or the aerodrome elevation as applicable, used in establishing compliance with appropriate obstacle clearance criteria.</p> <p><i>Note 1.— Obstacle clearance altitude is referenced to mean sea level and obstacle clearance height is referenced to the threshold elevation or in the case of non-precision approach procedures to the aerodrome elevation or the threshold elevation if that is more than 2 m (7 ft) below the aerodrome elevation. An obstacle clearance height for a circling approach procedure is referenced to the aerodrome elevation.</i></p> <p><i>Note 2.— For convenience when both expressions are used they may be written in the form "obstacle clearance altitude/ height" and abbreviated "OCA/H".</i></p>	CV CAR 1.F (a)	No Difference		

Report on entire Annex

Annex Reference	OPERATION OF AIRCRAFT Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Operational control. The exercise of authority over the initiation, continuation, diversion or termination of a flight in the interest of the safety of the aircraft and the regularity and efficiency of the flight.	CV-CAR 9 9.A.115 (11)	No Difference		
Chapter 1 Reference Definition	Operational flight plan. The operator's plan for the safe conduct of the flight based on considerations of aeroplane performance, other operating limitations and relevant expected conditions on the route to be followed and at the aerodromes concerned.	CV-CAR 9 9.A.115 (22)	No Difference		
Chapter 1 Reference Definition	Operations manual. A manual containing procedures, instructions and guidance for use by operational personnel in the execution of their duties.	CV-CAR 9 9.A.115 (18)	No Difference		
Chapter 1 Reference Definition	Operations specifications. The authorizations, conditions and limitations associated with the air operator certificate and subject to the conditions in the operations manual.	CV-CAR 9 9.A.115 (12)	No Difference		
Chapter 1 Reference Definition	Operator. The person, organization or enterprise engaged in or offering to engage in an aircraft operation.	CV CAR 1.F (a) CV CAR 2.1.A.115 (45)	No Difference

Chapter 3 Reference 3.1.1 Standard	<p style="text-align: center;">CHAPTER 3. GENERAL</p> <p><i>Note 1.— Although the Convention on International Civil Aviation allocates to the State of Registry certain functions which that State is entitled to discharge, or obligated to discharge, as the case may be, the Assembly recognized, in Resolution A23-13 that the State of Registry may be unable to fulfil its responsibilities adequately in instances where aircraft are leased, chartered or interchanged — in particular without crew — by the operator of another State and that the Convention may not adequately specify the rights and obligations of the State of the operator in such instances until such time as Article 83 bis of the Convention enters into force. Accordingly, the Council urged that if, in the above-mentioned instances, the State of Registry finds itself unable to discharge adequately the functions allocated to it by the Convention, it delegate to the State of the Operator, subject to acceptance by the latter State, those functions of the State of Registry that can more adequately be discharged by the State of the Operator. It was understood that pending entry into force of Article 83 bis of the Convention the foregoing action would only be a matter of practical convenience and would not affect either the provisions of the Chicago Convention prescribing the duties of the State of Registry or any third State. However, as Article 83 bis of the Convention entered into force on 20 June 1997, such transfer agreements will have effect in respect of Contracting States which have ratified the related Protocol (Doc 9318) upon fulfilment of the conditions established in Article 83 bis.</i></p> <p><i>Note 2.— In the case of international operations effected jointly with aeroplanes not all of which are registered in the same Contracting State, nothing in this Part prevents the</i></p>	CV-CAR 8 8.E.115 b),1)	No Difference
